Converting Neptune C-Map to Gartrip files

1) In Neptune C-Map, use mouse to place wpts as a route.

2) Export route as .txt

3) In Notepad, replace all ,51. with ,51space

,003. with ,003 space

SAVE

4) In Garmin, create new route: label eg DUNK-GRAV

5) In Garmin, label first WPT eg DG1; copy each WPT from .txt eg 51 57.88N into new WPT (and long eg 0 01.5W);

OK!; WPT into route? YES

6) SAVE Garmin (route and WPTS)

7) Check via Chart, map, draw

File, print (with coords)
